NYK Line.
Others

Operation Manager
: NYK Line

The oil that Miracle Boy Filtration processes lubricate turbine engine and drive gear

Manage the vessel by sophisticated turbine and significant power gear

Person

The lubrication system of the turbine that is the heart of the vessel is managed by

Miracle Boy SRC-8110-22V

Ultra-high precision filtration

So far, the oil change needs the preparation of vacuum cars and tankers, workers on a large scale and regularly.

“Miracle Boy” filtration system cleans up oxidation products and moisture and contaminants from the turbine lubrication, and reduce any labor to change oil that needs big expenses.

Furthermore, the safety that is indispensable was improved.
